Study Date: 07-27-2022
MRN: 52247-066
Age/Sex: 63 y / F
DOB:
Reading: Adelson, Anthony

Institution: TALLAHASSEE FCI-MAMMO
Modality:
Description: Screening-Bilateral
Mammography
Referring: DU
Accession: 200722-1611411-1
Report Date: 8/11/2022 4:42 PM

EXAM: BILATERAL SCREENING MAMMOGRAPHY WITH CAD

TECHNIQUE: Bilateral digital CC and MLO views were performed supplemented with CAD.

CLINICAL DATA: Screening. Asymptomatic. Family history of breast cancer in mother at 70s. History of benign right breast needle biopsy in 1990s.

PRIOR STUDIES: No prior studies are available.

FINDINGS: Breast density: Heterogeneously dense

No suspicious mass, calcification, architectural distortion or asymmetry.

IMPRESSION: No mammographic evidence of malignancy.

BI-RADS: 1, negative

Recommendation: Routine annual screening mammography.

Disclaimer: Dense breasts will decrease sensitivity and may obscure small masses, and may be an independent risk factor for breast cancer. In these patients additional screening with breast ultrasound or breast MRI may be of value. 10-15% of cancers are not identified by mammography or other imaging modalities. Negative mammogram or other imaging report should not preclude further evaluation which could include biopsy of a palpable concern.

PLEASE NOTE AS PER FEDERAL GUIDELINES, THE ABOVE FINDINGS HAVE BEEN MAILED TO THE PATIENT.

Thank you for the opportunity to participate in the care of this patient.

<p>ANA IFA is a first line screen for detecting the presence of up to approximately 150 autoantibodies in various autoimmune diseases. A negative ANA IFA result suggests an ANA-associated autoimmune disease is not present at this time, but is not definitive. If there is high clinical suspicion for Sjogren's syndrome, testing for anti-SS-A/Ro antibody should be considered. Anti-Jo-1 antibody should be considered for clinically suspected inflammatory myopathies.</p> <p>AC-O: Negative</p> <p>International Consensus on ANA Patterns (https://doi.org/10.1515/ccm-2018-0052)</p> <p>For additional information, please refer to http://education.questdiagnostics.com/faq/FAQ177 (This link is being provided for informational / educational purposes only.)</p>
